ASTER

Imagine a ribbon of pink, azure, rose, crimson, white, scarlet and blue, so solidly made of 3 to 3½ inch fully-double flowers that the foliage literally cannot be seen! Each plant is 24 inches high, yet takes less than 12 inches of space—all the flowers are *on top*—as many as 20 long-stemmed cut-flowers per plant. August blooming; highly wilt-resistant of course. — mixture.

EARLY GIANTS. If a short season before frost keeps you from enjoying giant asters, you need Early Giants. Four to six weeks earlier, and fully wilt-resistant they still bear wiry non-branching stems and large ostrich-feather flowers. New Azure Blue, Crimson and White join Rose Marie, Peach Blossom and Light Blue so we can offer a blended mixed as well. — Pkt. ea. 25c; 6 colors \$1.25

BELL OF IRELAND

BELLS OF IRELAND is an interesting novelty item for both home gardener and commercial grower, and especially around St. Patrick's Day for the florist. Plants grow about two feet tall and have long graceful stems for cutting. Both foliage and flowers are the same attractive light green color. Flowers practically cover the stem, are delicately veined and have a small white center. For a table arrangement it is completely different and unusually attractive. Bells of Ireland is also a good hot weather flower. —

SUPER GIANTS ASTERS

Largest of all Asters and a superb cutflower, the new WILT-RESISTANT Super Giants replace all other giant asters. Long wiry, non-branching stems are a feature of BEVERLY HILLS (azure), EL MONTE (crimson), HOLLYWOOD (white), PASADENA (peach blossom), LOS ANGELES (shell pink) and SANTA BARBARA (purple). MIXED is blended from these colors.

Hearts and Honey

AMAZING NEW CLIMBING VINE WITH
MAGIC FLOWERS THAT CHANGE COLOR..
3 COMPLETELY DIFFERENT PHASES EACH DAY

HEARTS AND HONEY is a novelty flower "touched with magic"—one of the most colorful and unusual flowers ever offered. It's pretty as a picture and so easily grown everywhere that one really doesn't have to have green in his thumbs to bring it into a mass of colorful bloom. Hearts and Honey is one of the easiest to grow of all annual climbing vines. It produces beautiful foliage, deeply cut like the leaf of a fern. It starts flowering extremely early, within seven weeks after the seed is sown, and is one of the most continuous flowering of all annuals, with masses of bright bloom until frost in the Fall.

It has a most unusual ability to change color. In early morning the flowers are a brilliant orange with a honey-like yellow center. Towards noon, a pinkish red with lighter center. And in late afternoon, a clear bright shade of rose pink with white center! Yes, here is a novelty

TITHONIA *a*

(Golden Flower of the Incas)

Torch (S.M., A.A.S., 1951) is earlier and dwarfer than the old fashioned Tithonia, therefore more desirable; grows waist high, compact, and upright; blooms from August to frost, striking 4 inch, orange red, single-Dahlia-like flowers. Pkt. 25c

Pampas Plume
COCKSCOMB

Baskets full of big, fleecy feathery flowers are what sold the public on this new type of Plumed Cockscomb this spring, when Golden Fleece was highly publicized and enthusiastically received by gardeners nation-wide. Now comes the same quick-growing, heat-loving, pest-free plant in all the brilliant colors of autumn leaves: gold, copper, deep red, scarlet, henna and carmine. 30 inch plants

COLOR MAGIC

MARIGOLD COLOR MAGIC has been one of the truly big surprises of recent introduction and there never has been enough seed to supply the demand.

Shades of yellow and gold irregularly marked with red to all maroon-red on the same plant. Flowers very double. Colors attractive. Plants uniform in habit and height, entirely covering bed. Flower production very heavy, a mass of color.

Novelties

Marigolds

TANGERINE

Tangerine is a twin to Fandango in every way except the color is rich orange. As good or better than Sun-kist, with slightly larger flowers and 2" taller plant.

FANDANGO (RUSTY RED)

A BIG JUMP AHEAD is Fandango over Scarlet Glow Marigold. Huskier plants, bigger and more flowers, much purer color, and a very uniform growth. Definitely replaces all other reds; highly recommended.

FLUFFY RUFFLES *African*

Giant golden flowers ruffled like a peony are what you get with Fluffy Ruffles. Quite early, it bears flowers the size of Real Gold (and that's *big*) and color of Frills on 20" base branching plants.

PARISIAN HYBRIDS

Now carnation-type flowers have been put on dwarf marigold plants in a strain called Parisian Hybrids. Full double, informal blooms run 2 inches across on foot-high plants. Their vari-colored patterns from pale yellow to deep copper red are the principal appeal. Pkts. 35c

Lemondrop,

MARIGOLD, LEMONDROP, should definitely replace Yellow Pigmy. Lemon-drop is 9 inches tall, profuse blooming, on compact plants.

Phlox Globe Mixed

Honorable Mention. It is a dwarf annual phlox for low edging, bedding, ground covers, rockeries and for pots and window boxes. It grows 5 to 6 inches high, with colors dominantly royal purple and white but with other phlox colors as well. Pkt. 25c

MARIGOLD GIANT SPRY. An important development in the dwarf class of Marigold. The blooms are about double the size of the regular Spry. The bushy type plants are nearly twice the diameter but only slightly taller than the regular Spry.

PETUNIA

PETUNIA COMANCHE (F-1 HYBRID)

Bronze Medal

It is the reddest of red petunias, richer, brighter, more uniform scarlet red and also somewhat larger than Fire Chief, Gold Medal winner of 1949.

Its hybrid vigor makes this a grand bedder, standing erect in most weather. Its more abundant, more brilliant, larger flowers on stronger plants make Comanche rather outstanding in this unique color range. Single flowers, $2\frac{1}{2}$ to $2\frac{3}{4}$

PETUNIA POPCORN, is a new Grandiflora Single Plain Edged variety identical in flower form and size of bloom with Snowstorm. However, it is earlier blooming exceedingly dwarf and compact.

PETUNIA Linda (Improved Silver Medal)

Here indeed is a lovely petunia, with a happy color. Extremely free-flowering, with blooms up to 3 inches, it is fine for bedding, for pots and boxes. It is compact and very vigorous, grows 15 to 18 inches high and spreads 24 to 30 inches. For a light, salmon pink, ask for Linda.

SALVIA FIREWORKS, "Early-Timed":

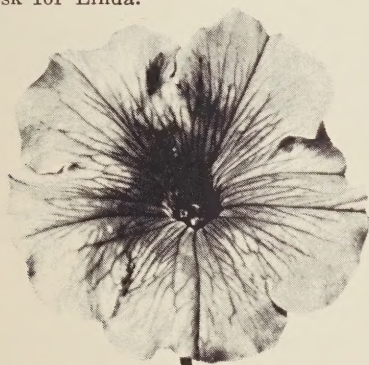

Fireworks, the latest introduction of this group, is a development out of St. John's Fire, and corresponds with that variety very closely, except that it is "early-timed"—every plant comes into flower much on the same date, extra early.

PERSIAN CARPET

No one needs an introduction to the A.A.S. winner Persian Carpet, which has sold over 1½ million retail packets each year since its introduction. Its dwarf plants begin blooming early; grow into tidy, well-behaved 12" mounds of color, each plant different. ➡

SUNSHINE TINTS

Striking as they are, Giant Zinnias are just too heavy for bowl arrangements in the house, as many a woman gardener has probably told you. The answer is Pumila Sunshine Tints: 3" perfect formal flowers with long cutting stems. The 15" plants suit the middle border, too.

◆ PEPPERMINT STICK

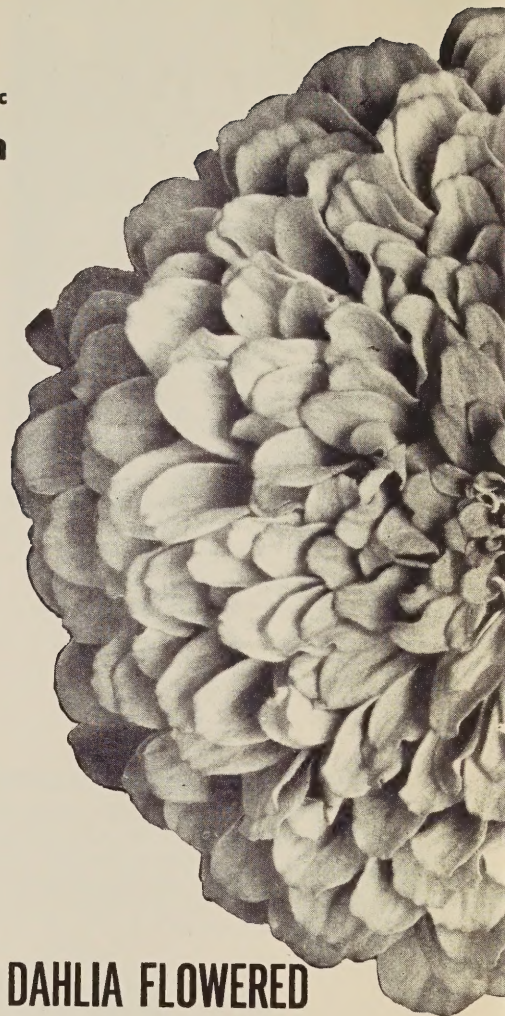

For the middle border of your "Garden of Zinnias" is the famous Peppermint Stick, which skyrocketed to fame in two years and sold over 1½ million retail packets in 1953. 3" candy-striped flowers in all colors on 18" cut-and-come-again plants. About 70% striped.

CUPID MIXED

Tiniest of all are the Cupid or Baby Zinnias, little button flowers on plants more compact and uniform than the Lilliput type. Their place in your "Garden of Zinnias" is right in front. Our new Cupid Mixed contains all colors, including many bicolor hybrids.

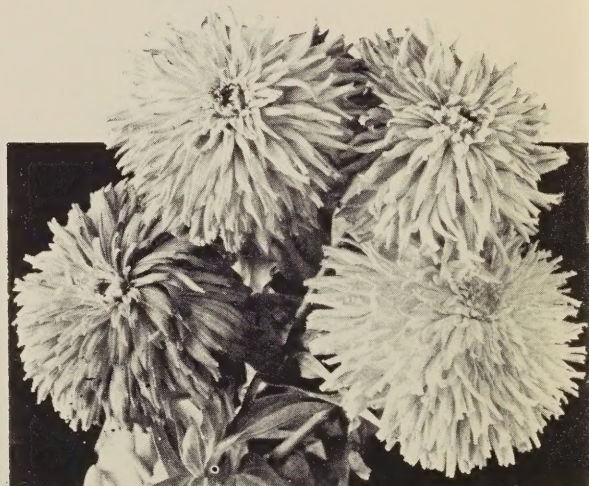

CACTUS FLOWERED ➡

A bright new star in Zinnias is the Giant Cactus-flowered, which has boomed in two years to high favor with the gardening public. Our selected strain is uniform, fully double, and contains all the brilliant colors as well as bicolor hybrids.

DAHLIA FLOWERED

Kingpin in any Zinnia garden is still Dahlia-flowered or California Giant (whichever suits your area best). Our world-famous originator's strains are better than ever, and the special collection envelope will be designed to let you use either.

Zoysia Lawn Grass

For Lawns of Distinction. Beauty and Permanence...

The Most Talked of Grass Among the Lovers of Fine Lawns

ZOYSIA JAPONICA (Japanese Lawn Grass)

CROWDS OUT CRABGRASS

Zoysia japonica, commonly known as Japanese Lawn Grass, was first introduced into the United States about 35 years ago from Korea where the climate approximates that of New York State.

Zoysia japonica is a low growing, sod forming perennial which if not mowed, will grow to a height of about 9 inches. It has a broad, somewhat coarse leaf similar to Red Top, but does not grow as tall.

Zoysia japonica is the only variety of Zoysia which is hardy and will grow in the South as well as in the North. It should never be confused with Zoysia matrella which is of value only to the southern end of Florida where it is sold as sod under the name of Flawn.

It is generally believed that Zoysia japonica will be of great value for the following reasons:

- (1) Its ability to withstand heat, long periods of drought and extremely cold climates.
- (2) Its ability to crowd out Crabgrass as it is most dominant during the Crabgrass season.
- (3) Its ability to provide a green cover during the summer months when other grasses, such as Kentucky Blue, turn brown and ragged. It will also hold its color into the late fall longer than others.
- (4) Its ability to withstand heavy traffic and its extraordinary healing qualities.
- (5) The fact that it is disease free and weed free. So far none of the known pests have attacked it. It is immune to Chinch Bugs.
- (6) Unlike its cousin Flawn, Zoysia japonica forms a loosely knit sod and in its early stages blends and lives in harmony with other grasses, especially Blue Grass.

25 WEST 43RD STREET
NEW YORK 36, N. Y.

November 30, 1953

Burnett-Seedsman, Inc.,
23 Warren St.,
New York 7, N. Y.

Gentlemen,

You asked to let you know when our Zoysia lawn would to turn brown

Now, the end of November, it is still a perfect green. Our Zoysia lawns are the admiration of everyone - they could not be more perfect, and the \$500 I invested in Zoysia seed last Spring is far cheaper than spending \$500 for the usual hundred pounds of ordinary lawn seed and several hundred bags of fertilizer, and the labor of applying it all, every Fall, not to mention the daily Summer sprinkling of the lawns- something not needed for the Zoysia.

This much I will say-- it just is not practical to sow Zoysia seed alone to start a lawn. I would say the best plan for a new lawn is to sow it in the Fall, rather thinly, using mediocre grade of ordinary seed; let that come up-- you will have a fair quality lawn next Spring. Then that May, as soon as the ground is getting warm, go in and sow the Zoysia at the rate of 30 lbs. per acre, and rake it in, to get it down to the ground, and by August you will see it take a good hold-- and by the Fall it will have driven out all the ordinary grass seed, and you will have a perfect Zoysia lawn.

Very truly yours

Joel E. Fisher
Joel E. Fisher

December 14, 1953

Dear Sirs,

As to the Zoysia, it is certainly not a fact that turns brown after the first frost. Our Zoysia Japonica is still beautiful and green, as of December 12, and there have been several frosts already. If you wish, it is perfectly OK for you to what part of my letter about the Zoysia you feel inclined to.

December 23, 1953

Gentlemen,

Even after last week's 10° temperature, your Zoysia Japonica is still perfectly green; the only brown spot is in the far end of the lawn, full of Crab Grass, which I left to itself as a check

Why the Mystery?

Why Shouldn't You Know What Is in a Good Lawn Grass Seed Mixture Before You Buy It You Should Know What You Are Buying

- FACT 1 The more Certified Illahee Creeping Fescue and Kentucky Blue Grass a mixture contains, the better the mixture.
- FACT 2 Both are Perennials and live indefinitely. However, they require two or three years to reach full maturity.
- FACT 3 Meanwhile they need quick-growing Red-Top and Rye Grass as nurse crops to shade them in their early growth.
- FACT 4 Your first year's lawn is mostly Red Top and Rye Grass.
- FACT 5 After a few years, Certified Illahee Creeping Fescue and Kentucky Blue Grass will be at their best; they form the permanent lawn.

BURNETT-SEEDSMEN'S "FORMULA NO. 1" is a NO. ONE

Lawn Grass Seed Mixture, because it is made up of 25% Illahee Fescue — 25% Kentucky Blue — 25% Red Top — 25% Rye Grass. Burnett-Seedsman's "Formula No. 1" is a balanced mixture. Burnett-Seedsman's "Formula No. 1" will grow in sun or shade.

BUILD LAWNS IN POOR SOILS WITH BURNETT-SEEDSMEN'S "POORSOIL LAWNMIX"

Drouth Resistant grasses is the answer to establishing a lawn in poor, sandy soils, for the same reason that camels, not horses, are used in the desert. - - So, Burnett-Seedsman have selected the best drouth grass, namely, **Creeping Red Fescue** (Illahae strain). Because of its tolerance of drouth, Illahee is especially adapted to dry, sandy or gravelly soils—poor or rich. Illahee Creeping Red Fescue produces a deep rooted sod that withstands tramping and abuse. It spreads out, carpet-like, by means of underground rootstocks and overground stems. The grass blades are rich green, fine, smooth and soft; they stay green when other grasses brown and sear in Summer. Illahee is disease resistant; stands close cutting; grows in sun or shade and reaches full maturity in two years. It grows well with **Highland Bent**, also included in **Burnett-Seedsman's Poorsoil Lawnmix**. **Highland Bent's** growth habit somewhat parallels Illahee Fescue, especially being able to withstand adverse conditions of climate and low soil fertility. To these two permanent grasses is added a small percentage of domestic Rye Grass which acts as a nurse crop. **Burnett-Seedsman's "Poorsoil Lawnmix"** contains 75% Illahee Fescue, 5% Highland Bent and 20% domestic Rye grass, by weight.

1 lb. \$1.50; 5 lbs. \$6.95 10 lbs. \$13.50; 25 lbs. \$32.50; 100 lbs. \$125.00.

Shady Place Lawn Grass Seed Mixture

Certain grasses, like certain flowers, revel and flourish in the shade. By including sufficient quantities of the shade loving grasses along with commodious amounts of the choicest dwarf and creeping grasses, you may be assured of a successful lawn in the shade. Remember, in shaded situation where the sun's rays do not permeate sufficiently to dry the ground, a damp and acid condition exists. It is well to add lime before sowing.

1 lb. \$1.50; 5 lbs. \$6.95 10 lbs. \$13.50; 25 lbs. \$32.50; 100 lbs. \$125.00.

Special Lawn Grass Seed Mixture

You sow and sow, and sow, when, providing the proper mixture, one sowing should be sufficient. With our **Special Lawn Grass Seed Mixture** you can sow a lawn with complete assurance of immediate results within 5 to 7 days which will become more beautiful with the ensuing months. Accurately compounded to include biennial and perennial, choice, re-cleaned grasses of highest germination. It contains no fillers; one pound will sow 200 sq. feet of surface. **Lb. \$1.15; 5 lbs. \$5.25; 10 lbs. \$10.25; 25 lbs. \$25.00**

NEW BLUE GRASS . . . MERION B-27

Although Kentucky Blue grass makes the finest lawn carpet, it does not grow well in warm climates and in poor, sandy soils, and is subject to disease, which slowly kills it off. A new strain, **Merion B-27** has been developed that is **disease resistant** and does well everywhere. Only handfuls are available. **1 lb. \$4.95. 5 lbs. \$24.25;** Larger quantities quoted on request.

MAKE ROOTED CUTTINGS of Those Rare "HARD-TO-ROOT" Plants By Using Hormodin Powder

PARADISE (New '41)

Here is an asparagus that actually
 comes into bearing **ONE YEAR
 EARLIER** than any other variety.
 An exceptionally strong, vigorous
 producer. Some say it produces
 twice the crop of ordinary aspara-
 gus. The stalks are like Martha
 Washington in appearance, large
 and green. Just imagine, only 6 to
 8 stalks needed to make a pound.
 Its flavor is unusually mild and
 liked by all. Paradise is rust-
 resistant. Seed sown in Spring
 will bear asparagus for picking 2
 years later. One year old Para-
 dise roots, set out this Spring,
 will produce next year, asparagus
 as large and stalky as ordinary
 two- and three-year-old roots.

Roots: 1 yr. old—100, \$5.00.
 2 yr. old—100, \$6.00.
